FROZEN MEAL REHEATING INSTRUCTIONS

- Frozen meals **must be put in your freezer as soon as you get them from your driver**. Do not leave them out and do not put one in your refrigerator unless you plan to thaw it.
- You may thaw a frozen meal before you cook it-but **always** thaw it in the refrigerator. **DO NOT** leave a meal out on the counter to thaw.
- It will take at least 8 hours for your meal to thaw in the refrigerator.
- **DO NOT** let a meal thaw in the refrigerator for more than 24 hours. You should eat a frozen meal within 24 hours of it being placed in the refrigerator.
- **DO NOT REFREEZE** a meal once it is thawed.
- How to cook a frozen or thawed meal:
 - **OVEN:** Preheat your oven to 350° F. Cook thawed meals for 30 minutes. Frozen meals will take about 45 minutes. Some meals, like casseroles, may take up to an hour. Keep the plastic film on to prevent food from drying out.
 - **MICROWAVE:** Heat thawed meals for approximately 3-4 minutes on high power. A frozen meal may take 5-7 minutes in some microwaves. If you cook the meal too long it can dry out. Keep the plastic film on and cut a small slit in the middle. If the microwave does not turn on its own, then turn the meal half way through cooking to help the food to heat evenly.
